Specification Summary

Brand	ERA
Product type	Non Deadlocking

Product Description

The ERA 133 Traditional Non-Deadlocking Nightlatch is a classic, surface-mounted rim lock designed to replace most existing front door locks, as well as providing additional security for new or interior timber doors.

This versatile nightlatch is non-handed, making it suitable for both left and right-handed doors. It can be fitted to inward or outward opening doors, though please note that outward-opening installations require a separate staple. A simple, user-friendly snib button on the inside allows you to deadlock the latch or hold the bolt back mechanically.

The ERA 133 is supplied as a complete kit, including a 5-pin rim cylinder, three keys, and all necessary fixings. This nightlatch is available in multiple case finishes (including Green and Polished Brass), weights (540g and 550g), and

manufacturer references (133 31 and 133 81). Please choose your preferred options from the selection below.

Brand Profile

ERA

ERA (often seen as **ERA Home Security**) is one of the long-standing names in UK locking and hardware, rooted in the **West Midlands** and heavily tied to the **door & window** trade. ERA traces its origins to **1838**, when **John Reynolds** started a locksmith business in **Willenhall**—a town that's basically the spiritual capital of British lockmaking.

These days ERA positions itself as a "home security expert" that **designs, develops, manufactures, and distributes** a broad range of products for the residential building and home improvement market—spanning **cylinders and door hardware**, **window hardware**, **smart/security products**, and associated ironmongery ranges (including brands like **Crompton** under the ERA umbrella).

On the corporate side, ERA was historically part of **Tyman plc** (you'll see that referenced in older deal/industry material). More recently, ERA states directly that it is **now part of Quanex** (NYSE: NX) following Quanex's acquisition of Tyman.
