Specification Summary

Brand	ERA
Product type	Budget Locks

Product Description

The ERA 415 Budget Rim Lock is a simple and cost-effective locking solution designed for a wide range of low-security applications. It is ideal for securing meter cupboards, store cupboards, access panels, lamp post panels, and various other doors where high security is not a primary requirement.

Constructed with a durable steel body and finished in bright zinc chromate, this budget rim lock offers reliable performance and corrosion resistance. Its simple, reversible design allows it to be fitted to both left and right-handed doors. The lock is operated using a standard T-key (available separately), making it a practical choice for utility and maintenance access.

Because of its straightforward construction and economical price point, the ERA 415 is frequently used in multiple quantities to secure larger panels or multiple doors across commercial, residential, and industrial sites.

Brand Profile

ERA

ERA (often seen as **ERA Home Security**) is one of the long-standing names in UK locking and hardware, rooted in the **West Midlands** and heavily tied to the **door & window** trade. ERA traces its origins to **1838**, when **John Reynolds** started a locksmith business in **Willenhall**—a town that's basically the spiritual capital of British lockmaking.

These days ERA positions itself as a "home security expert" that **designs, develops, manufactures, and distributes** a broad range of products for the residential building and home improvement market—spanning **cylinders and door hardware**, **window hardware**, **smart/security products**, and associated ironmongery ranges (including brands like **Crompton** under the ERA umbrella).

On the corporate side, ERA was historically part of **Tyman plc** (you'll see that referenced in older deal/industry material). More recently, ERA states directly that it is **now part of Quanex** (NYSE: NX) following Quanex's acquisition of Tyman.
