Specification Summary

Brand	Evva
Product type	Rim Cylinders

Product Description

The EVVA A5 AZG standard UK rim cylinder is a basic yet robust 5-pin locking solution designed for reliable everyday security. Keyed to differ as standard, this solid-construction cylinder is supplied complete with a solid machined rose and two connecting screws for a straightforward installation.

The EVVA A5 system features an unrestricted key profile with an 'A' section (with an 'F' section available to special order). It is fire-tested to offer up to 30 minutes of fire resistance at temperatures up to 821°C.

This cylinder is available in multiple finishes, including Polished Brass and Nickel Plated. Please select your preferred finish from the options below.

The system can also be configured with a variety of optional special features to suit specific requirements, including construction keying (CMK), ABC Vario (VAR), additional key numbering (TXT), sea water protection (SEW), bump resistance (SG-A), adapted entry (FLEX), and plug pulling protection (ARS/KZS). Please contact us if you require any of these bespoke options.

Technical Specifications

- **Brand:** Evva
- **Cylinder System:** Evva A5
- **Cylinder Type:** Rim Cylinder
- **Mechanism:** 5-pin
- **Keying:** Keyed to Differ (KD)
- **Keys Supplied:** 3
- **Fire Tested:** Grade 0 (30-minute fire resistance up to 821°C)
- **Key Profile:** Unrestricted 'A' section (F section to special order)
- **Weight:** 205g
- **Finishes:** Polished Brass and Nickel Plated (please choose from the options below)

Key Features

- **Solid Construction:** Supplied complete with a solid machined rose and two connecting screws.
- **Robust 5-Pin Security:** Basic yet reliable 5-pin mechanism suitable for standard UK rim locks.
- **Fire Rated:** Offers up to 30 minutes of fire resistance at temperatures up to 821°C.
- **Unrestricted Key Profile:** Allows for easy key duplication and management.
- **Bespoke Options Available:** Can be ordered with special features such as construction keying, sea water protection, bump resistance, and plug pulling protection (please contact us for details).

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
