Brand	Evva
Product type	Accessories

Product Description

The EVVA AirKey & Xesar Cylinder Assembly Tool is a specialist accessory designed for the installation, maintenance, and servicing of EVVA electronic cylinders. This compact and lightweight tool is specifically engineered to facilitate the seamless assembly and disassembly of the electronic thumb turn on EVVA AirKey and Xesar cylinders.

In addition to cylinder assembly, this tool is required for routine maintenance, including safely opening the thumb turn to replace the batteries. Its simple, user-friendly design ensures that security professionals and facility managers can carry out battery changes and cylinder adjustments quickly and without causing damage to the delicate electronic components.

Whether you are installing a new access control system or performing routine maintenance on existing EVVA AirKey or Xesar cylinders, this genuine EVVA assembly tool is an essential addition to your toolkit.

Technical Specifications

- **Brand:** EVVA
- **Manufacturer Reference:** E.ZU.PZ.ZW.V1
- **Finish:** Silver

- **Weight:** 27g
- **Pack Quantity:** 1
- **Suits Product:** EVVA AirKey & Xesar Cylinders
- **Barcode:** 5055120764016

Key Features

- **Essential Maintenance Tool:** Required for assembling and disassembling the electronic thumb turn on EVVA Xesar and AirKey cylinders.
- **Battery Replacement:** Necessary for opening the cylinder to replace the internal batteries safely.
- **User-Friendly Design:** Simple and straightforward to use, preventing accidental damage to electronic components during servicing.
- **Genuine EVVA Accessory:** Manufactured by EVVA to ensure perfect compatibility and reliable performance.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
