Specification Summary

Brand	Evva
Product type	Cards & Fobs

Product Description

The EVVA AirKey Combi Proximity Fob & Key is the ideal solution for properties utilising a hybrid of mechanical and electronic security. Designed specifically to suit EVVA AirKey EPS and ICS cylinders, this combi key integrates a mechanical key with an electronic proximity fob housed inside an ergonomic black key bow.

By combining both systems into a single device, it provides convenient dual access. Users can operate mechanical locks on one side and electronic locking systems on the other, eliminating the need to carry separate keys and fobs. The electronic credential can be easily programmed and managed using EVVA AirKey Credits (KeyCredits) via the online administration platform or a compatible smartphone.

With its durable construction and lightweight design, this combi key offers a seamless and highly efficient way to manage access control across your home or business.

Technical Specifications

- **Brand:** EVVA
- **Compatibility:** Designed to suit EVVA AirKey EPS & ICS cylinders
- **Finish:** Black
- **Weight:** 55g
- **Pack Quantity:** 1
- **Barcode:** 5056240120775

Key Features

- **Dual Access Convenience:** Combines mechanical key and electronic proximity fob functionality into a single, easy-to-use device.
- **Ergonomic Design:** Features a comfortable, durable plastic key bow that houses the integrated electronic chip.
- **Simplified Key Management:** Reduces the number of credentials users need to carry for hybrid mechanical and electronic systems.
- **AirKey System Integration:** Fully compatible with the EVVA AirKey online administration system and programmable using AirKey Credits.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
