Specification Summary

Brand	Evva
Product type	Cards & Fobs

Product Description

The EVVA AirKey Proximity Tag is a stylish and robust key fob designed specifically to operate the EVVA AirKey range of electronic proximity locks. Crafted with durability in mind, these fobs feature a strong, integrated loop that allows them to be easily secured to keyrings, key tags, or hung neatly inside a key cabinet.

Utilising advanced MIFARE DESFire EV1 technology, these proximity fobs provide secure and reliable access control. They are available in various pack quantities, weights, and manufacturer references to suit your specific installation requirements. Please select your preferred pack quantity and options from the choices below.

Technical Specifications

- **Brand:** EVVA
- **Technology:** MIFARE DESFire EV1
- **Finish:** Black
- **Suits Product:** EVVA AirKey Proximity Locks
- **Pack Quantity:** 5, 25, or 100 (please choose from the options below)
- **Weight:** 276g, 1.38kg, or 5.52kg (please choose from the options below)
- **Manufacturer Reference:** Multiple options available (please choose from the options below)
- **Barcode:** Multiple options available (please choose from the options below)

Key Features

- **Seamless Compatibility:** Designed specifically to operate the EVVA AirKey range of proximity locks.
- **Robust Construction:** Features a strong, integrated anchor point loop for secure attachment to keyrings, key tags, or cabinet hooks.
- **High Security:** Utilises secure MIFARE DESFire EV1 contactless technology.
- **Stylish Design:** Sleek, modern black finish that is both practical and professional.
- **Flexible Options:** Available in multiple pack sizes to suit both small residential and large commercial access control setups.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
