Specification Summary

Brand	Evva
Product type	Rim Proximity Cylinder

Product Description

The EVVA AirKey Rim Proximity Cylinder is a versatile, high-security electronic locking solution designed for doors fitted with standard rim locks where one-sided access authorisation is required. Perfect for residential properties, short-term holiday lets, and commercial premises, this cylinder allows you to easily replace your existing mechanical rim cylinder and upgrade to a smart access control system.

With the EVVA AirKey, access is managed and granted using NFC-compatible smartphones (both Android and iOS), Bluetooth, or physical AirKey cards and key tags. Keys can be sent securely over the internet via SMS text messages with push notifications, making it incredibly convenient to hand over access remotely.

Built to withstand the elements, the cylinder features an IP65 weatherproof rating and operates reliably in temperatures ranging from -20°C to +55°C, making it suitable for both internal and external doors. It is supplied with two CR2 batteries, offering a long operational life of up to 30,000 cycles, and features a modular design that allows for future adaptations.

This cylinder is available in multiple finishes, including Nickel Plated and Polished Brass. Please select your preferred finish and manufacturer reference from the options below.

Technical Specifications

- **Brand:** Evva
- **Cylinder Type:** Rim Cylinder
- **Cylinder System:** Evva AirKey
- **Mechanism:** Proximity
- **Battery:** 2 x CR2 (included)
- **Battery Life:** 30,000 operations
- **IP Rating:** IP65
- **Operating Temperature:** -20°C to +55°C
- **Audit Trail:** Last 1,000 events
- **Handed:** Reversible
- **Keys Supplied:** 0
- **Knob Diameter:** 39mm
- **Knob Projection:** 45mm
- **Standards:** CE Marked
- **Fire Tested:** Grade 0
- **Cylinder Kitemark:** No
- **Secured By Design:** No
- **Sold Secure:** No
- **Finishes:** Nickel Plated or Polished Brass (please choose from the options below)

Key Features

- **Smart Access Control:** Open doors using an NFC-compatible smartphone (Android or iPhone), Bluetooth, or AirKey cards and key tags.
- **Remote Key Management:** Send digital keys securely via SMS text messages with push notifications.
- **Weatherproof Design:** IP65 rated and suitable for temperatures between -20°C and +55°C, perfect for indoor and outdoor use.
- **One-Sided Authorisation:** Ideal for doors requiring access control on the outside only.
- **Easy Installation:** Designed to fit where standard rim cylinders are used.
- **Anti-Tamper Security:** Plug pulling resistant for enhanced physical security.
- **Modular Design:** Allows for future adaptation and adjustment.
- **Long Battery Life:** Supplied with 2 x CR2 batteries providing up to 30,000 cycles.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
