Specification Summary

Brand	Evva
Product type	Body Only

Product Description

The EVVA Brass Open Shackle Padlock Body is a robust, high-quality padlock housing designed for use with EVVA HPM cylinder inserts. Supplied as a body-only unit (without a cylinder), it allows you to easily integrate your choice of high-security EVVA cylinder, making it an excellent option for custom security setups and master key systems.

Constructed from solid brass with an elegant polished brass finish, this padlock body is built to withstand regular use. It is available in two body widths - 47mm and 55mm - with weights of 270g and 400g respectively. Please select your preferred body width and specification from the options below.

This open shackle body is fully compatible with a variety of EVVA HPM padlock modules, providing a versatile and secure locking solution once paired with a compatible cylinder insert.

Technical Specifications

- **Brand:** Evva
- **Body Material:** Brass
- **Finish:** Polished Brass
- **Body Width:** 47mm or 55mm (please choose from the options below)

- **Weight:** 270g or 400g (please choose from the options below)
- **Manufacturer Reference:** PADLOCK BODY 47mm STD or PADLOCK BODY 55mm STD (please choose from the options below)
- **Barcode:** 5055120612010 or 5055120611990 (please choose from the options below)
- **Pack Quantity:** 1
- **Packaging:** Boxed

Key Features

- **Body Only Design:** Supplied without a cylinder, offering the flexibility to install your own compatible EVVA insert.
- **Broad Compatibility:** Accepts EVVA A5, GPI, DPS, 3KS, and MCS HPM padlock modules.
- **Solid Brass Construction:** Features a durable brass body with a polished brass finish for reliable protection.
- **Multiple Sizes:** Available in 47mm and 55mm widths to suit different application requirements (please select below).
- **Master Key Ready:** Ideal for incorporating padlocks into new or existing EVVA master key suites.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
