Specification Summary

Brand	Evva
Product type	Accessory

Product Description

The EVVA C50 10mm Security Rose is a high-quality, robust cylinder accessory designed to provide an extra layer of physical protection for Euro profile cylinders. Manufactured by the renowned security specialist EVVA, this round security escutcheon is engineered to help defend your lock against common forced entry methods, including drilling, snapping, and pulling attacks.

Featuring a secure bolt-through fixing design, the C50 security rose is anchored directly through the door. This heavy-duty installation method ensures the escutcheon cannot be easily pried or forced off from the outside, keeping your cylinder shielded. With a 10mm projection and a clean Nickel Plated (NP) finish, it delivers a sleek, modern look that seamlessly blends with contemporary door hardware while offering reliable, long-lasting durability.

Technical Specifications

- **Brand:** EVVA
- **Model/Series:** C50
- **Type:** Security rose / escutcheon
- **Profile:** Euro profile
- **Shape:** Round
- **Depth/Projection:** 10mm
- **Finish:** Nickel Plated (NP)
- **Fixing Type:** Bolt-through
- **Weight:** 100g
- **Manufacturer Reference:** C50
- **Part Number:** L15931

Key Features

- **Enhanced Cylinder Protection:** Shields Euro profile cylinders against physical attacks such as drilling, snapping, and pulling.
- **Secure Bolt-Through Fixing:** Anchors the rose securely through the door to prevent it from being pried or forced off.
- **Durable Nickel Plated Finish:** Offers a clean, modern aesthetic that resists wear and complements contemporary door hardware.
- **Robust Construction:** Solid metal design from a trusted, industry-leading security manufacturer.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
