Specification Summary

Brand	Evva
Product type	Accessory

Product Description

The EVVA D32 10mm Security Rose is a high-quality, bolt-through security escutcheon designed to provide robust protection for Euro profile cylinders. Manufactured by the security specialists EVVA, this security rose is an essential accessory for enhancing the physical security of your doors.

By shielding the cylinder, the D32 security rose helps protect against common forced entry methods, such as cylinder snapping, drilling, and pulling. Its bolt-through design ensures a secure and solid installation, making it incredibly difficult for intruders to pry or force the escutcheon off from the outside.

Featuring a durable nickel-plated finish, this 10mm projection rose offers a sleek, modern appearance that seamlessly blends with contemporary door hardware. It is lightweight yet strong, weighing just 22g, and is engineered to deliver long-lasting performance and peace of mind.

Technical Specifications

- **Manufacturer:** EVVA
- **Part Number:** L15930
- **Manufacturer Reference:** D32
- **Profile Compatibility:** Euro profile
- **Projection / Depth:** 10mm
- **Finish:** Nickel Plated (NP)
- **Weight:** 22g

Key Features

- **Enhanced Cylinder Protection:** Helps shield Euro profile cylinders against snapping, drilling, and pulling attacks.
- **Bolt-Through Fixing:** Provides a highly secure installation that resists tampering and forced removal from the exterior.
- **Durable Construction:** Manufactured by EVVA to ensure high-quality performance and reliable security.
- **Sleek Aesthetics:** Features a clean nickel-plated finish to complement modern door hardware.
- **Lightweight Design:** Weighs only 22g while maintaining strong physical resistance.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
