Specification Summary

Brand	Evva
Product type	Key Cap

Product Description

The EVVA EPS Coloured Key Caps (Small) are designed specifically for use with EVVA EPS keys. These durable key caps are an ideal solution for organising and identifying your keys quickly and easily, helping to prevent confusion when managing multiple locks.

Available in a vibrant range of colours, these key caps are simple to fit and provide a comfortable, tactile grip. They are supplied individually, allowing you to mix and match colours to suit your specific key-coding system. Please select your preferred colour and specification from the options below.

Technical Specifications

- **Brand:** EVVA
- **Compatibility:** Suitable for EVVA EPS keys
- **Finish/Colour:** Available in Black, Blue, Green, Orange, Red, and Yellow (please choose from the options below)
- **Weight:** 15g to 20g (please choose from the options below)
- **Pack Quantity:** 1
- **Manufacturer Reference:** EPS/KC/BK, STKC02 BLUE, STKC02 Green, STKC02 ORANGE, STKC02 RED, or STKC02 Yellow (please choose from the options below)

Key Features

- **Quick Identification:** Colour-code your keys to make individual keys easily identifiable at a glance.
- **Durable Construction:** Robust design built to withstand daily wear and tear.
- **Easy to Fit:** Simple, push-on design allows for quick installation onto your existing EVVA EPS keys.
- **Tactile Grip:** Provides a comfortable surface that makes keys easier to hold and turn.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
