Specification Summary

Brand	Evva
Product type	Rim Cylinders

Product Description

The EVVA EPSnp AZG Rim Cylinder is a high-security, patent-protected mechanical locking solution designed to offer outstanding protection and convenience. Supplied keyed to differ on our secure in-house section, this cylinder is an economical yet highly reliable choice for both residential and commercial applications.

With patent protection extending until 2041, the EPS (Extended Profile System) utilizes advanced legal and technical key protection mechanisms to prevent unauthorized key copying. It is built to withstand physical attacks, boasting the highest grades for both attack resistance and lock security under BS EN 1303:2005.

This versatile rim cylinder is available in multiple finishes, including Black and Nickel Plated. Please select your preferred finish and specification from the options below. For bespoke requirements, a range of optional special features - such as construction keying (CMK), sea water protection (SEW), and enhanced plug pulling protection (KZS) - are available upon request.

Technical Specifications

- **Brand:** EVVA
- **Cylinder Type:** Rim Cylinder
- **Cylinder System:** EVVA EPS
- **Mechanism:** 6 Pin
- **Keying:** Keyed To Differ
- **Keys Supplied:** 3
- **Standards:** BS EN 1303:2005, BS EN 1634-1
- **Fire Testing:** Grade B (Approved for EI30 and E30 fire and smoke doors)
- **Finishes:** Black, Nickel Plated (please choose from the options below)

Key Features

- **Long-Term Patent Protection:** Patented and registered system protected until 2041 to prevent unauthorized key duplication.
- **High Security Rating:** Complies with the highest standards, achieving Grade 6 lock security and Grade 2 attack resistance under EN 1303:2005.
- **Robust Resistance:** Wear-resistant and drill-resistant construction for long-lasting durability.
- **Fire Door Approved:** Certified for use on EI30 and E30 fire and smoke doors to EN 1634-1.
- **Flexible Options:** Available in multiple finishes and compatible with optional advanced features like construction keying and marine-grade protection.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
