Specification Summary

Brand	Evva
Product type	Scandinavian Oval

Product Description

The EVVA EPSnp SKA External Scandinavian Oval Cylinder is a highly secure, economical mechanical locking solution designed for external doors. Part of the EVVA Extended Profile System (EPS), this cylinder offers exceptional legal and technical key protection to prevent unauthorised key copying, with patent protection active until 2041.

Supplied keyed to differ on our in-house section, this 6-pin cylinder comes complete with three keys. It features a robust nickel-plated finish and is built to withstand physical attacks, complying with the highest standards of EN 1303:2005 (Grade 6 Lock Security and Grade 2 Attack Resistance). It is also fire-tested to Grade B (BS EN 1634), making it a reliable choice for both residential and commercial applications where durability and high security are paramount.

Please note that optional special features - such as construction keying (CMK), ABC Vario (VAR), sea water protection (SEW), and plug pulling protection (KZS/ARS) - are available upon request. Please contact our team for more details.

Technical Specifications

- **Brand:** EVVA
- **Cylinder Profile:** Scandinavian Oval (External - SKA)
- **Mechanism:** 6-pin
- **Finish:** Nickel Plated
- **Keying:** Keyed to Differ (in-house section)
- **Keys Supplied:** 3
- **Standards:** BS EN 1303:2005, BS EN 1634 (Fire Tested Grade B)
- **Security Grades:** Lock Security Grade 6, Attack Resistance Grade 2 (highest grades under EN 1303:2005)
- **Patent Protection:** Active until 2041

Key Features

- **High Security:** Achieves the highest security and attack resistance ratings under BS EN 1303:2005.
- **Key Protection:** Patented and registered system provides robust legal and technical protection against unauthorised key duplication.
- **Durable Construction:** Wear and drill-resistant design ensures long-lasting performance.
- **Fire Rated:** Grade B fire-tested in accordance with BS EN 1634.
- **Complete Package:** Supplied ready to install with three keys.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
