Specification Summary

Brand	Evva
Product type	Rim Cylinders

Product Description

The EVVA GPI AZG Rim Cylinder MK is a high-quality, master-keyed replacement rim cylinder designed to offer robust security and reliable performance. Featuring EVVA's Ground Profile Integrated (GPI) system, this cylinder utilizes a restricted key profile with up to 32,000 different sections, making unauthorised key duplication exceptionally difficult.

The cylinder is engineered with a unique conical key and keyway shape, which significantly hampers the insertion of picking tools, providing enhanced protection against manipulation. It features a reliable 5-pin mechanism and is supplied with a solid rose and three keys as standard.

This master-keyed (MK) rim cylinder is ideal for integration into master key suites. It is available in multiple finishes, including Nickel Plated and Polished Brass. Please select your preferred finish from the options below.

Technical Specifications

- **Manufacturer:** EVVA
- **Mechanism:** 5 Pin
- **Keying:** Master Keyed (MK)
- **Keys Supplied:** 3
- **Weight:** 205g
- **Packaging:** Boxed
- **Manufacturer Reference:** AZG MK

Key Features

- **Restricted Key Profile:** Features EVVA's GPI system with up to 32,000 different sections to prevent unauthorised key duplication.
- **Anti-Pick Design:** Conical key and keyway shape hampers the insertion of picking tools.
- **Master Keyed:** Supplied master keyed, making it ideal for integration into master key systems.
- **Multiple Finishes Available:** Choose between Polished Brass and Nickel Plated finishes below.
- **Complete Package:** Supplied with a solid rose and three keys as standard.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
