Specification Summary

Brand	Evva
Product type	Double Oval

Product Description

The EVVA GPI ODZ Oval Double Cylinder MK is a premium master-keyed cylinder designed for integration into the Aldridge Master Key (AMK) suite. It is compatible with both AMK1 and AMK2 systems (each offering 600 differs plus master), as well as the AMK GMK system, allowing for seamless sub-master keying (SMK) from stock.

Built on EVVA's innovative Ground Profile Integrated (GPI) system, this cylinder provides exceptional protection against picking and unauthorised key duplication. The unique conical shape of the key and keyway hampers the insertion of picking tools, while profile variations across the entire height of the keyway offer superior security. With a restricted key profile that supports up to 32,000 different sections, it is an ideal choice for secure, multi-level access control.

This master-keyed double oval cylinder is available in multiple options to suit your security and aesthetic requirements. You can choose from finishes including Polished Brass and Nickel Plated, with cylinder sizes with cam available in 31/10/31 or 31/10/1931. Depending on your selection, the cylinder weight ranges from 260g to 300g. Please select your preferred options from the choices below.

Technical Specifications

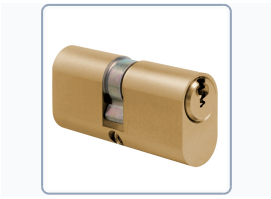

- **Cylinder Profile:** Oval
- **Cylinder Type:** Double Cylinder
- **Keying:** Master Keyed (AMK Suite)
- **Mechanism:** 5 Pin
- **Overall Length:** 72mm (36/36)
- **Cylinder Size With Cam:** 31/10/31 or 31/10/1931 (Please choose from the options below)
- **Finish:** Polished Brass or Nickel Plated (Please choose from the options below)
- **Keys Supplied:** 3
- **Weight:** 260g to 300g (Please choose from the options below)

Key Features

- Conical key and keyway shape hampers picking tools and deters unauthorised duplication
- Profile variations across the entire keyway height for enhanced security
- Restricted key profile with up to 32,000 different sections available
- Part of the Aldridge Master Key (AMK) suite, compatible with AMK1, AMK2, and GMK systems
- Supplied with 3 keys

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
