Specification Summary

Brand	Evva
Product type	Banham

Product Description

The EVVA ICS L111 Banham Cylinder is a high-security replacement double cylinder designed specifically to suit Banham rim nightlatches. Featuring an offset bolt-through fixing hole, this cylinder is engineered to fit seamlessly into Banham lock cases, providing a robust and reliable upgrade to your door security.

This cylinder utilizes the EVVA ICS (Internal Coding System) technology, a highly durable and patent-protected reversible key system. The ICS system combines multiple locking technologies, including a 10-pin mechanism, to offer exceptional resistance against picking, bumping, and drilling. Its reversible key design ensures smooth, user-friendly operation.

Supplied keyed to differ on the Aldridge in-house key section, this cylinder comes complete with three keys. It offers both legal and technical key protection, ensuring that duplicate keys can only be cut by authorised partners, preventing unauthorised key copying. This left-handed cylinder is finished in high-quality nickel plating, combining sleek aesthetics with heavy-duty performance.

Technical Specifications

- **Cylinder Type:** Banham (to suit Banham rim nightlatches)
- **Cylinder Profile:** Euro
- **Cylinder System:** EVVA ICS (Internal Coding System)
- **Mechanism:** 10-pin
- **Keying:** Keyed to differ (Aldridge in-house section)
- **Keys Supplied:** 3
- **Handing:** Left hand
- **Finish:** Nickel Plated
- **Dimensions:** 36mm (A Side) / 71mm (B Side) (107mm overall body length)
- **Standards:** BS EN 1303:2005, BS EN 1634 Grade B (Fire Tested)

Key Features

- **Tailored Compatibility:** Designed specifically to suit Banham rim nightlatches with an offset bolt-through fixing hole
- **Patent-Protected Security:** EVVA ICS reversible key system prevents unauthorised key copying with legal and technical protection
- **High-Security Mechanism:** Durable 10-pin system offers excellent resistance to drilling, picking, and bumping
- **User-Friendly Operation:** Reversible key design allows easy insertion and smooth operation from either side
- **Ready to Install:** Supplied with 3 keys on the Aldridge in-house key section
- **Robust Construction:** Durable nickel-plated finish with wear-resistant internal components

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
