Specification Summary

Brand	Evva
Product type	Screw In

Product Description

The EVVA ICS RM2 Screw-In Cylinder is a high-security, patent-protected locking solution designed for long-lasting durability and exceptional keying potential. Supplied keyed to differ on the Aldridge in-house section, this cylinder is ideal for both individual security and complex master key systems that may require future expansion.

The ICS (Inner Code System) features a reversible key design, offering superb convenience and smooth, reliable operation. It is engineered with both legal and technical key protection mechanisms to prevent unauthorised key duplication, ensuring your property remains secure. Built to withstand heavy use, this cylinder is highly wear and drill-resistant, and it is certified to BS EN 1303:2005 and BS EN 1634 (Grade B fire testing).

This 29mm nickel-plated cylinder is supplied complete with three keys. It is also compatible with a range of optional special features, such as construction keying (CMK), ABC Vario (VAR), sea water protection (SEW), and plug pulling protection (KZS). Please contact us if you require any of these bespoke options.

Technical Specifications

- **Brand:** EVVA
- **Cylinder System:** EVVA ICS
- **Cylinder Type:** Screw-In
- **Length:** 29mm
- **Finish:** Nickel Plated
- **Mechanism:** 10 Pin
- **Keying:** Keyed To Differ
- **Keys Supplied:** 3
- **Standards:** BS EN 1303:2005, BS EN 1634 (Grade B Fire Tested)
- **Handing:** Reversible

Key Features

- **Patented Key Protection:** Features legal and technical protection mechanisms to prevent unauthorised key copying.
- **Reversible Key Design:** Offers smooth, user-friendly operation with a convenient reversible key.
- **High Security & Durability:** Wear and drill-resistant construction provides robust physical protection.
- **Master Key Potential:** High calculation capacity makes it ideal for planning complex, expandable master key systems.
- **Bespoke Options:** Compatible with special features including construction keying, sea water protection, and plug pulling protection (available upon request).

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
