Specification Summary

Brand	Evva
Product type	Banham Cylinders

Product Description

The EVVA ICS S363KZ Key & Turn Banham Cylinder is a high-security, patent-protected replacement cylinder designed specifically to suit Banham locks. Featuring the advanced EVVA ICS (Inner Code System) multi-track technology, this cylinder offers exceptional protection against unauthorised key copying, picking, and drilling.

Supplied keyed to differ with three keys, the ICS system utilizes a durable, reversible key design for ease of use. It is engineered to meet the highest security standards, achieving Grade 6 Security and Grade 2 Attack Resistance under BS EN 1303:2005. This makes it an ideal choice for both residential and commercial applications where robust physical security is paramount. Additionally, it is fire-tested to BS EN 1634 (Grade B), making it suitable for use on fire and smoke doors.

Technical Specifications

- **Brand:** EVVA
- **Cylinder Type:** Banham Key & Turn (Thumbturn)
- **Cylinder System:** ICS (Inner Code System)
- **Overall Length:** 72mm (36mm / 36mm)
- **Cylinder Size with Cam:** 31mm / 10mm / 31mm
- **Finish:** Nickel Plated
- **Mechanism:** 10-pin
- **Keying:** Keyed to Differ
- **Keys Supplied:** 3
- **Standards:** BS EN 1303:2005, BS EN 1634 (Grade B Fire Tested)

Key Features

- **Banham Compatibility:** Designed specifically as a direct replacement for Banham S363 cylinders.
- **Patent Protected:** Features a registered, patent-protected key system to prevent unauthorised key duplication.
- **High Security:** Complies with the highest security standards (Grade 6 Security and Grade 2 Attack Resistance under BS EN 1303:2005).
- **Reversible Key Design:** Durable and user-friendly reversible keys for smooth insertion and operation.
- **Drill & Wear Resistant:** Built with robust internal components to resist drilling and wear over time.
- **Fire Tested:** Grade B fire-tested to BS EN 1634, making it suitable for fire and smoke-resistant doors.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
