Specification Summary

Brand	Evva
Product type	Scandinavian Oval

Product Description

The EVVA ICS SKA External Scandinavian Oval Cylinder is a high-security, patent-protected locking solution designed for external doors. Supplied keyed to differ on the Aldridge in-house restricted section, this cylinder offers exceptional durability and robust protection against unauthorised key copying.

Utilising EVVA's ICS (Inner Code System) reversible key technology, the cylinder features a robust 10-pin mechanism that provides high resistance to wear and drilling. The system is designed with maximum keying potential in mind, making it an excellent choice for planning and extending complex master key systems.

A range of optional special features can be configured upon request, including plug pulling protection (KZS), sea water protection (SEW), and construction keying (CMK). Please contact us for more details.

Technical Specifications

- **Cylinder Profile:** Scandinavian Oval (External)
- **Cylinder System:** EVVA ICS
- **Mechanism:** 10-Pin
- **Finish:** Nickel Plated
- **Keying:** Keyed to Differ (supplied on Aldridge in-house section)
- **Keys Supplied:** 3
- **Standards:** BS EN 1303:2005, BS EN 1634 (Grade B Fire Tested)

Key Features

- **Patent-Protected System:** Legal and technical key protection mechanisms prevent unauthorised key duplication.
- **Reversible Key Convenience:** User-friendly reversible key entry for smooth, reliable operation.
- **High Security & Durability:** Wear and drill-resistant construction with a robust 10-pin mechanism.
- **Master Key Potential:** Designed with high keying potential to easily accommodate future system extensions.
- **Fire Tested:** Certified to BS EN 1634 (Grade B) for peace of mind on fire-rated doors.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
