Brand	Evva
Product type	Miscellaneous

Product Description

The EVVA KDZ-KDZ Equal Euro Turn & Turn Cylinder is a high-quality, reliable locking solution designed for applications requiring keyless operation from both sides of a door. Featuring a convenient thumbturn on both ends, this turn-and-turn cylinder is ideal for internal doors, partitions, or specific commercial and residential settings where quick and easy locking is essential.

Part of the robust EVVA A5 cylinder system, this Euro profile cylinder is built to last. It measures 72mm in total length, split equally at 36mm on each side (36mm / 36mm), ensuring a balanced fit for compatible doors. The cylinder is finished in a high-quality nickel plating, providing excellent durability and a sleek, modern look that seamlessly coordinates with contemporary door hardware.

Whether you are upgrading existing door hardware or installing a new system, the EVVA KDZ-KDZ offers a practical and dependable solution from a trusted brand in security.

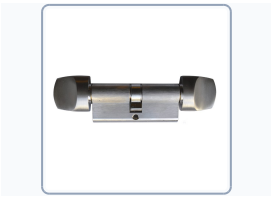

Technical Specifications

- **Brand:** EVVA
- **Cylinder Profile:** Euro
- **Cylinder System:** EVVA A5
- **Cylinder Type:** Turn & Turn
- **Body Length:** 72mm
- **A Side:** 36mm
- **B Side:** 36mm (Turn)
- **Finish:** Nickel Plated
- **Mechanism:** Thumbturn
- **Fire Tested:** Grade 0
- **Keys Supplied:** 3
- **Weight:** 272g

Key Features

- **Double Thumbturn Operation:** Features a thumbturn on both ends for easy, keyless locking and unlocking from either side.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
