Specification Summary

Brand	Evva
Product type	Key Cap

Product Description

The EVVA Key Tag SKR-C is a coloured insert designed specifically to fit into the keyring hole of EVVA key bows. This simple yet highly effective accessory is the perfect solution for colour-coding your keys, allowing you to identify different doors, access areas, or individual keys at a quick glance.

Constructed to fit securely into the key bow hole without interfering with your keyring, these inserts help keep your keys organised and professional-looking. They are available in a choice of eight vibrant colours, including Black, Blue, Green, Orange, Pink, Red, White, and Yellow. Please choose your preferred finish and manufacturer reference from the options below.

Technical Specifications

- **Brand:** EVVA
- **Compatibility:** Designed to fit EVVA key bow keyring holes
- **Pack Quantity:** 1
- **Weight:** 10g
- **Available Finishes:** Black, Blue, Green, Orange, Pink, Red, White, and Yellow (please select from the options below)

- **Manufacturer References:** TAG-BLACK, TAG-BLUE, TAG-GREEN, TAG-ORANGE, TAG-PINK, TAG-RED, TAG-WHITE, TAG-YELLOW (please select from the options below)

Key Features

- **Easy Key Identification:** Colour-code your keys for quick and easy identification at a glance.
- **Secure Fit:** Designed to fit perfectly into the keyring hole of EVVA key bows.
- **Eight Colour Options:** Available in a choice of 8 vibrant colours to suit your organisation needs.
- **Durable Construction:** Lightweight and robust design to withstand daily use.

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
