Is Cylinder

Product Description

The EVVA KHZ Euro Half Turn Cylinder (also known as a blind cylinder) is a high-quality half euro profile cylinder designed specifically for situations that require thumbturn operation from one side only. With no keyway on either side, this blind cylinder provides a neat, secure solution for doors, panels, or cabinets where key access is not required or desired.

Featuring an adjustable cam, the EVVA KHZ offers reliable performance and straightforward installation. To suit your specific door thickness and aesthetic preferences, this cylinder is available in a range of sizes and finishes. You can choose between body lengths of 41mm or 46mm (with corresponding sizes to the centre of the cam of 32mm or 36mm) and select either a Polished Brass or Nickel Plated finish. Please choose your preferred size, reference, and finish from the options below.

Technical Specifications

- **Brand**: Evva
- **Cylinder Type**: Half Euro (Blind Cylinder)
- **Cylinder Profile**: Euro
- **Body Length**: 41mm or 46mm (please choose from the options below)
- **Size to Centre of Cam**: 32mm or 36mm (please choose from the options below)
- **Cylinder Size with Cam**: 32/9 or 37/9 (please choose from the options below)
- **Finish**: Nickel Plated or Polished Brass (please choose from the options below)
- **Mechanism**: Thumbturn only (no keyway)
- **Keys Supplied**: 0
- **Weight**: 357g to 377g

Brand Profile

Evva

EVVA is an Austrian, **family-owned** security manufacturer based in **Vienna**, specialising in high-end **mechanical and electronic locking systems** for everything from homes to large, complex master-keyed organisations. The company was **founded in Vienna in 1919**, and it still runs **research, development, and production** from its Vienna headquarters, exporting globally.

In the trade/spec world, EVVA's reputation is built on **serious key control** and **master key system engineering**—locks designed not just to resist attack, but to keep access hierarchies manageable at scale (offices, hospitals, residential complexes, universities, etc.).

A couple of EVVA's standout mechanical platforms get referenced constantly:

- **ICS (Inner Code System)** – a reversible key system aimed at **highly complex master key structures**, with EVVA citing long patent protection (into the 2030s, depending on jurisdiction).
- **MCS (Magnetic Code System)** – EVVA positions this as a top-tier system for sophisticated master keying, with a strong anti-copying story (including resistance to modern replication methods).

They also explicitly brand themselves around innovation: EVVA talks about holding **200+ patents** and frames its history as "start-up energy since 1919" (which is an absolutely deranged sentence for a century-old lock company, but I respect the audacity).
