Specification Summary

Brand	Exidor
Product type	Outside Access Device

Product Description

The Exidor 322SE (also known as the 322EC) is a robust, lever-operated outside access device (OAD) designed to provide secure, keyed entry from the outside of an emergency exit door. Fully compatible with the Exidor 200 and 300 series panic and emergency exit hardware, this unit is ideal for commercial and public buildings.

To ensure compliance with accessibility guidelines, the lever design meets the dimensional requirements of BS8300 and Approved Document "M" (DDA). Security is enhanced by a built-in shear screw, which is engineered to break under excessive force to prevent unauthorised entry, without compromising the internal escape mechanism.

The unit is non-handed (fully reversible) and is supplied as standard with a 45mm Euro profile cylinder and three keys. It features the same fixing points as the Exidor 302 OAD, making it an excellent choice for quick and easy retrofitting.

Technical Specifications

- **Brand:** Exidor
- **Manufacturer Reference:** 332SE / 322SE (also known as 322EC)
- **Finish:** Silver Enamelled
- **Cylinder Type:** 45mm Euro profile cylinder (included)
- **Keys Supplied:** 3
- **Handing:** Reversible (non-handed)
- **Door Thickness:** Suitable for doors up to 55mm thick as standard
- **Width:** 60mm
- **Depth:** 88mm
- **Fixing:** Surface mounted with 3 concealed machine screws

Key Features

- **DDA Compliant:** Meets the dimensional requirements of BS8300 and Approved Document "M" for inclusive design.
- **Compatibility:** Suitable for use with Exidor 200 and 300 series panic and emergency exit hardware.
- **Security Shear Screw:** Lever is fitted with a shear screw designed to break under excessive force to prevent forced entry.
- **Easy Retrofit:** Shares the same fixing points as the Exidor 302 OAD for straightforward replacement.
- **Concealed Fixings:** Surface mounted on the outside of the door using three concealed machine screws for added security.

Brand Profile

Exidor

Exidor is a UK panic-and-emergency-exit hardware brand best known for **push bars, push pads, and multi-point exit devices** used on fire exits and escape routes in commercial buildings. It's one of those "you don't notice it until you *really* need it" brands—built around reliable, standards-compliant egress hardware.

Exidor says it has been a leading manufacturer in this category for **around 90 years**, and trade/brand info places its establishment at **1931**.

Standards & compliance are central to the brand's positioning: Exidor panic and emergency exit devices are marketed as **CE marked** and **tested to EN 1125 (panic exit devices)** and **EN 179 (emergency exit devices)**—the core European standards that specifiers and installers care about for public buildings and controlled escape routes.

Ownership / group: Exidor was acquired by **ASSA ABLOY Opening Solutions UK & Ireland in 2018** (widely reported in trade press), and Companies House filings list **Assa Abloy Limited** as the controlling party.

Where it sits today: Exidor is now presented as a **range within the UNION family** (ASSA ABLOY's UK door hardware portfolio), and the brand is used across "real world" commercial projects where you might need bespoke finishes, different keep/bolt options, alarms, or microswitch variants for monitoring.
