Specification Summary

Brand	Exidor
Product type	Outside Access Device

Product Description

The Exidor 425 EC is an elegant, lever-operated outside access device (OAD) designed to provide secure, keyed entry for doors fitted with Exidor 400 Series Touch-Bar panic hardware. This robust unit ensures that emergency egress remains completely unaffected; immediate exit is always possible from the inside, regardless of whether the outside device is locked or unlocked.

Engineered for high-traffic environments, the Exidor 425 EC features a smart lever design that meets the dimensional requirements of BS 8300 and the Equality Act 2010, making it ideal for barrier-free access. When locked, the lever disengages from the mechanism and rotates freely. This clutch-like action prevents forced entry and protects the internal components from vandalism or accidental damage. Supplied with a Euro profile cylinder and three keys, this non-handed device is finished in a durable silver enamelled powder coating and is suitable for timber, steel, aluminium, or uPVC doors up to 57mm thick.

Technical Specifications

- **Brand:** Exidor
- **Model Reference:** 425EC
- **Compatibility:** Exidor 400 Series Touch-Bar Panic equipment
- **Cylinder Type:** Single Euro profile cylinder (included)
- **Keys Supplied:** 3
- **Handing:** Reversible (non-handed)
- **Finish:** Silver Enamelled
- **Maximum Door Height:** 2440mm
- **Maximum Door Width:** 1220mm
- **Door Thickness:** Suitable for doors up to 57mm thick
- **Dimensions:** 44mm (W) x 47mm (D)
- **Standards & Certifications:** CE marked; certified as an approved accessory under EN 1125 and EN 179

Key Features

- **Unrestricted Egress:** Always allows immediate exit from the inside, whether the outside unit is locked or unlocked.
- **Vandal Resistant:** When locked, the lever rotates freely without engaging the mechanism, preventing forced entry and protecting the unit from damage.
- **Inclusive Design:** Meets the dimensional requirements of BS 8300 and the Equality Act 2010 for barrier-free access.
- **Durable Finish:** Powder-coated silver enamelled finish provides excellent durability in high-traffic areas.
- **Universal Handing:** Fully reversible design suitable for both left and right-hand opening doors.
- **Complete Kit:** Supplied boxed with a Euro cylinder, three keys, and all necessary fixings.

Brand Profile

Exidor

Exidor is a UK panic-and-emergency-exit hardware brand best known for **push bars, push pads, and multi-point exit devices** used on fire exits and escape routes in commercial buildings. It's one of those "you don't notice it until you *really* need it" brands—built around reliable, standards-compliant egress hardware.

Exidor says it has been a leading manufacturer in this category for **around 90 years**, and trade/brand info places its establishment at **1931**.

Standards & compliance are central to the brand's positioning: Exidor panic and emergency exit devices are marketed as **CE marked** and **tested to EN 1125 (panic exit devices)** and **EN 179 (emergency exit devices)**—the core European standards that specifiers and installers care about for public buildings and controlled escape routes.

Ownership / group: Exidor was acquired by **ASSA ABLOY Opening Solutions UK & Ireland in 2018** (widely reported in trade press), and Companies House filings list **Assa Abloy Limited** as the controlling party.

Where it sits today: Exidor is now presented as a **range within the UNION family** (ASSA ABLOY's UK door hardware portfolio), and the brand is used across "real world" commercial projects where you might need bespoke finishes, different keep/bolt options, alarms, or microswitch variants for monitoring.
