Is Cylinder

Product Description

The Exidor Rear Fix 40mm Half Euro Cylinder is specifically engineered for use with outside access panic hardware devices. It features a threaded hole in the rear of the cylinder to accept a fixing screw, ensuring a secure and reliable installation.

Constructed with a reliable 5-pin mechanism, this cylinder provides dependable security and smooth operation. It has an overall body length of 40mm (30/10 offset) and comes in a high-quality nickel-plated finish to complement modern door hardware. Each cylinder is supplied keyed to differ and is packed with three keys as standard.

Designed by Exidor, a trusted name in emergency exit hardware, this half euro cylinder is an ideal choice for maintaining the security and functionality of your commercial exit doors and panic escape systems.

Brand Profile

Exidor

Exidor is a UK panic-and-emergency-exit hardware brand best known for **push bars, push pads, and multi-point exit devices** used on fire exits and escape routes in commercial buildings. It's one of those "you don't notice it until you *really* need it" brands—built around reliable, standards-compliant egress hardware.

Exidor says it has been a leading manufacturer in this category for **around 90 years**, and trade/brand info places its establishment at **1931**.

Standards & compliance are central to the brand's positioning: Exidor panic and emergency exit devices are marketed as **CE marked** and **tested to EN 1125 (panic exit devices)** and **EN 179 (emergency exit devices)**—the core European standards that specifiers and installers care about for public buildings and controlled escape routes.

Ownership / group: Exidor was acquired by **ASSA ABLOY Opening Solutions UK & Ireland in 2018** (widely reported in trade press), and Companies House filings list **Assa Abloy Limited** as the controlling party.

Where it sits today: Exidor is now presented as a **range within the UNION family** (ASSA ABLOY's UK door hardware portfolio), and the brand is used across "real world" commercial projects where you might need bespoke finishes, different keep/bolt options, alarms, or microswitch variants for monitoring.
