### Product Description

The Exitex Digitex Front Finger Guard is an essential safety solution designed to prevent fingers from getting trapped in the hinge gap of a door. Measuring 1960mm (1.96m) in length, it is designed to suit most standard UK door heights, providing full-length protection. This front finger guard is ideal for use in schools, nurseries, daycare centres, hospitals, and commercial or public buildings where injury prevention is a priority.

It is simple to fit and comes prepacked with all the necessary fittings included. By completely covering the gap created on the hinge side of the door when open, it helps to eliminate the risk of painful finger-trapping accidents.

This product is available in multiple finishes, including White and Brown, with corresponding manufacturer references and barcodes. Please choose your preferred finish and reference from the options below.
