Specification Summary

Brand	Fingersafe
Product type	Injury Prevention

Product Description

The Fingersafe MK1B Hinge Pin Side Finger Protector is a highly effective safety solution designed to prevent finger-trapping accidents on the hinge pin (rear/pull) side of doors. By covering the exposed hinge gap where the barrels are visible, this guard shields children and adults alike from painful crushing injuries.

Ideal for schools, nurseries, commercial premises, and residential properties, the MK1B is easy to install and fits the full length of the door. Its durable, concertina-shaped design is constructed from high-quality PVC and TPE, providing excellent impact resistance while allowing the door to operate smoothly. In addition to its safety benefits, the protector also acts as a practical draft excluder and smoke inhibitor. It is suitable for both interior and exterior doors and can fit over standard parliament hinges.

Technical Specifications
