Product Description

The FIRESTOP Commercial FD30/60 Door Viewer 180° is a high-quality security solution designed for both domestic and commercial doors. Manufactured from robust grade 304 stainless steel, this door viewer is fully FD30 and FD60 fire rated, making it suitable for use on fire-resisting doors.

Equipped with a 19mm crystal glass lens, it provides a wide 180° angle of vision, allowing you to clearly identify visitors before opening the door. For added privacy and security, it features an integrated robust shutter. This viewer is designed to fit doors with a thickness ranging from 35mm to 55mm.

Certified to BS EN 1670 for corrosion resistance, this durable door viewer is built to last and comes complete with a 10-year manufacturer's guarantee.

It is available in multiple high-quality finishes, including Chrome Plated, Polished Brass, and Stainless Steel. Please select your preferred finish and corresponding manufacturer reference (FS323, FS324, or FS325) from the options below.

Technical Specifications

- **Angle of Vision:** 180°

- **Lens Diameter:** 19mm
- **Door Thickness:** 35mm to 55mm
- **Material:** Grade 304 Stainless Steel
- **Fire Rating:** FD30 & FD60
- **Standards:** Certified to BS EN 1670
- **Finishes Available:** Chrome Plated, Polished Brass, or Stainless Steel (please choose from the options below)
- **Manufacturer References:** FS323, FS324, or FS325 (please choose from the options below)

Key Features

- **Enhanced Security:** Wide 180° viewing angle with a crystal glass lens to easily identify visitors
- **Fire Rated:** Suitable for both FD30 and FD60 fire doors
- **Robust Construction:** Manufactured from high-grade 304 stainless steel for long-lasting durability

Brand Profile

Firestop

Firestop is a UK manufacturer specialising in **passive fire protection** products for doors and hardware, best known for **intumescent seals** and **intumescent "hardware protection" kits** that help fire doors keep their integrity when exposed to heat and smoke. They position the brand around "protecting life and property," with **25+ years** of experience supplying the UK and overseas markets.

What Firestop actually makes (the stuff you'll see in the trade channel):

- **Intumescent fire & smoke seals** (the strips that expand in a fire to close the gap between door and frame).
- **Intumescent ironmongery protection**: sheets/pads/liners used behind or around items like **hinges, locks, latches and closers** to maintain the fire-rating of the door set.
- **Fire-rated ironmongery** items such as **intumescent letter plates** and **door viewers**, designed so adding openings to a fire door doesn't ruin the door's performance.
- Often also stocked as **drop-down door seals** and related door-bottom sealing hardware for fire/smoke control and acoustic performance.

A detail they stress is **traceability**: Firestop highlights a **traceable production code / certification** approach so installers/specifiers can link products back to compliance evidence and batch provenance.
