Product Description

The FIRESTOP Contract FD30 Door Viewer 180° is an essential security accessory designed to enhance safety in both residential and commercial properties. Manufactured with a robust stainless steel construction, this door viewer allows you to clearly identify visitors before opening the door. It features a high-quality 19mm crystal glass lens that provides a wide 180° angle of vision, ensuring a clear and unobstructed view of the exterior.

Engineered specifically for fire safety, this door viewer is FD30 fire rated and comes complete with an intumescent sleeve to maintain the fire integrity of the door. It is designed to suit doors with a thickness ranging from 35mm to 55mm.

This door viewer is available in a selection of finishes, including Chrome Plated, Polished Brass, and Satin Chrome, with corresponding manufacturer references (FS326, FS327, or FS328) and barcodes. Please select your preferred finish, reference, and barcode from the options below.

Brand Profile

Firestop

Firestop is a UK manufacturer specialising in **passive fire protection** products for doors and hardware, best known for **intumescent seals** and **intumescent "hardware protection" kits** that help fire doors keep their integrity when exposed to heat and smoke. They position the brand around "protecting life and property," with **25+ years** of experience supplying the UK and overseas markets.

What Firestop actually makes (the stuff you'll see in the trade channel):

- **Intumescent fire & smoke seals** (the strips that expand in a fire to close the gap between door and frame).
- **Intumescent ironmongery protection**: sheets/pads/liners used behind or around items like **hinges, locks, latches and closers** to maintain the fire-rating of the door set.
- **Fire-rated ironmongery** items such as **intumescent letter plates** and **door viewers**, designed so adding openings to a fire door doesn't ruin the door's performance.
- Often also stocked as **drop-down door seals** and related door-bottom sealing hardware for fire/smoke control and acoustic performance.

A detail they stress is **traceability**: Firestop highlights a **traceable production code / certification** approach so installers/specifiers can link products back to compliance evidence and batch provenance.
