Specification Summary

Brand	Firestop
Product type	Intumescent Strips & Seals

Product Description

The FIRESTOP Self-Adhesive Universal Intumescent Deadlock Kit is an essential safety solution designed to protect door ironmongery and prevent the spread of fire. Ideal for fireproofing commercial and residential properties, this kit is manufactured from a high-performance, 1mm thick flexible intumescent sheet. When exposed to heat, the material expands to many times its original volume, sealing the cavity around the lock to provide an effective barrier against fire and smoke.

Engineered for quick and straightforward installation, the kit features a self-adhesive backing and pre-scored fold lines for an easy, full wraparound fit. This universal design is highly versatile, accommodating both radius and square forends, and is suitable for locks with 64mm and 76mm case depths. The kit comes complete with both strike plate and forend protection, ensuring comprehensive coverage.

Rigorously tested to BS EN 1634-1 and BS 476: Part 22 standards, this UK-manufactured intumescent kit is fully approved for use in both 30-minute and 60-minute fire door applications.

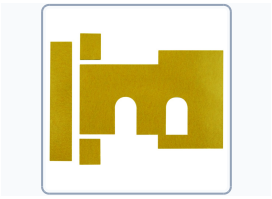

Technical Specifications

- **Brand:** Firestop
- **Manufacturer Reference:** FS1273
- **Thickness:** 1mm
- **Width:** 75mm
- **Weight:** 90g
- **Fire Rating:** 30 to 60 minutes (1/2 to 1 hour)
- **Standards:** Tested to BS EN 1634-1 and BS 476: Part 22
- **Compatibility:** Suitable for 64mm and 76mm case depths
- **Pack Quantity:** 1

Key Features

- **UK Manufactured:** High-quality construction designed to meet strict UK fire safety standards.
- **Intumescent Protection:** Expands significantly when heated to seal gaps around the lock and block fire.
- **Universal Fit:** Scored fold lines allow for easy wraparound, making it suitable for both radius and square forends.
- **Self-Adhesive Backing:** Features a high-performance adhesive backing for quick and secure installation.
- **Complete Kit:** Supplied with both strike plate and forend protection for comprehensive coverage.

Brand Profile

Firestop

Firestop is a UK manufacturer specialising in **passive fire protection** products for doors and hardware, best known for **intumescent seals** and **intumescent "hardware protection" kits** that help fire doors keep their integrity when exposed to heat and smoke. They position the brand around "protecting life and property," with **25+ years** of experience supplying the UK and overseas markets.

What Firestop actually makes (the stuff you'll see in the trade channel):

- **Intumescent fire & smoke seals** (the strips that expand in a fire to close the gap between door and frame).
- **Intumescent ironmongery protection**: sheets/pads/liners used behind or around items like **hinges, locks, latches and closers** to maintain the fire-rating of the door set.
- **Fire-rated ironmongery** items such as **intumescent letter plates** and **door viewers**, designed so adding openings to a fire door doesn't ruin the door's performance.
- Often also stocked as **drop-down door seals** and related door-bottom sealing hardware for fire/smoke control and acoustic performance.

A detail they stress is **traceability**: Firestop highlights a **traceable production code / certification** approach so installers/specifiers can link products back to compliance evidence and batch provenance.
