Specification Summary

Brand	Firestop
Product type	Intumescent Strips & Seals

Product Description

The FIRESTOP Self-Adhesive Universal Intumescent FB1/FB2 Deadlock Kit is designed to protect door ironmongery and prevent the spread of fire. It is an essential component when fireproofing properties, ensuring that rebated hardware does not compromise the integrity of fire doors.

Manufactured in the UK from a high-performance, 1mm thick flexible intumescent sheet, this kit features a self-adhesive backing for quick and easy installation. When exposed to heat, the material expands to many times its original volume, sealing the gaps around the lock case to form an effective barrier against fire and heat transfer.

The kit is designed with scored fold lines, allowing for a neat and simple wraparound application. It has been thoroughly fire tested to BS EN 1634-1 and BS 476: Part 22, making it suitable for both 30-minute and 60-minute fire door applications.

Technical Specifications

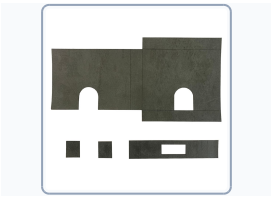

- **Brand:** Firestop
- **Manufacturer Reference:** FS1279

- **Thickness:** 1mm
- **Width:** 103mm
- **Height:** 80mm
- **Fire Testing:** Tested to BS EN 1634-1 and BS 476: Part 22
- **Fire Rating:** Suitable for 30 and 60-minute applications
- **Pack Quantity:** 1

Key Features

- **Fire Protection:** Expands to many times its original volume when heated, sealing gaps around the lock to prevent the spread of fire.
- **Self-Adhesive Backing:** Features a high-performance self-adhesive backing for quick, secure, and hassle-free installation.
- **Easy Wraparound Design:** Pre-scored fold lines allow the sheet to wrap neatly around the lock body.
- **UK Manufactured:** Proudly manufactured in the United Kingdom to high quality standards.
- **Universal Application:** Designed specifically to suit FB1 and FB2 deadlock installations.

Brand Profile

Firestop

Firestop is a UK manufacturer specialising in **passive fire protection** products for doors and hardware, best known for **intumescent seals** and **intumescent "hardware protection" kits** that help fire doors keep their integrity when exposed to heat and smoke. They position the brand around "protecting life and property," with **25+ years** of experience supplying the UK and overseas markets.

What Firestop actually makes (the stuff you'll see in the trade channel):

- **Intumescent fire & smoke seals** (the strips that expand in a fire to close the gap between door and frame).
- **Intumescent ironmongery protection**: sheets/pads/liners used behind or around items like **hinges, locks, latches and closers** to maintain the fire-rating of the door set.
- **Fire-rated ironmongery** items such as **intumescent letter plates** and **door viewers**, designed so adding openings to a fire door doesn't ruin the door's performance.
- Often also stocked as **drop-down door seals** and related door-bottom sealing hardware for fire/smoke control and acoustic performance.

A detail they stress is **traceability**: Firestop highlights a **traceable production code / certification** approach so installers/specifiers can link products back to compliance evidence and batch provenance.
