Specification Summary

Brand	Firestop
Product type	Intumescent Strips & Seals

Product Description

The FIRESTOP Self-Adhesive Universal Intumescent Tubular Latch Kit is designed to protect door ironmongery and prevent the spread of fire. It is an essential component when fireproofing properties, ensuring that rebated hardware does not compromise the integrity of fire doors.

Manufactured in the UK from high-performance 1mm thick flexible intumescent sheet, this kit expands to many times its original volume when exposed to heat. This expansion seals the gaps around the latch, creating an effective barrier against fire and heat transfer. The kit is pre-scored with fold lines for an easy, full wraparound

installation and features a self-adhesive backing for quick and secure fitting.

This universal kit is designed to suit both 64mm and 76mm latch case depths and comes complete with strike plate and forend protection. It has been fully fire tested to BS EN 1634-1 and BS 476: Part 22, making it suitable for both 30 and 60-minute (FD30/FD60) fire door applications.

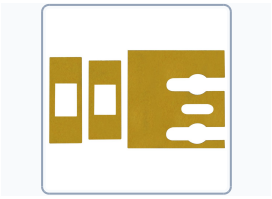

Technical Specifications

- **Brand:** Firestop
- **Manufacturer Reference:** FS1283
- **Material Thickness:** 1mm
- **Width:** 75mm
- **Compatibility:** Suitable for 64mm and 76mm case depths
- **Fire Rating:** 30 and 60 minutes (FD30 / FD60)
- **Standards:** Tested to BS EN 1634-1 and BS 476: Part 22
- **Pack Quantity:** 1

Key Features

- **Fire Protection:** Expands under heat to seal gaps around the latch and preserve door integrity.
- **Universal Fit:** Pre-scored fold lines allow for easy wraparound fitting to suit 64mm and 76mm latches.
- **Self-Adhesive Backing:** Quick and simple to install with peel-and-stick backing.
- **Complete Kit:** Supplied with dedicated protection for both the strike plate and forend.
- **UK Manufactured:** High-quality construction designed specifically for standard UK fire door hardware.

Brand Profile

Firestop

Firestop is a UK manufacturer specialising in **passive fire protection** products for doors and hardware, best known for **intumescent seals** and **intumescent "hardware protection" kits** that help fire doors keep their integrity when exposed to heat and smoke. They position the brand around "protecting life and property," with **25+ years** of experience supplying the UK and overseas markets.

What Firestop actually makes (the stuff you'll see in the trade channel):

- **Intumescent fire & smoke seals** (the strips that expand in a fire to close the gap between door and frame).
- **Intumescent ironmongery protection**: sheets/pads/liners used behind or around items like **hinges, locks, latches and closers** to maintain the fire-rating of the door set.
- **Fire-rated ironmongery** items such as **intumescent letter plates** and **door viewers**, designed so adding openings to a fire door doesn't ruin the door's performance.
- Often also stocked as **drop-down door seals** and related door-bottom sealing hardware for fire/smoke control and acoustic performance.

A detail they stress is **traceability**: Firestop highlights a **traceable production code / certification** approach so installers/specifiers can link products back to compliance evidence and batch provenance.
