Specification Summary

Brand	Gatemaster
Product type	Gate Locks

Product Description

The Gatemaster 5CDC Steel Deadlock Case is a robust and practical solution designed to simplify the installation of mortice locks into metal gates. Crafted from 2.5mm steel, this protective case is engineered to be welded directly into the gate frame, allowing it to be painted or galvanised alongside the gate for a seamless, professional finish.

Once installed, the case provides excellent physical protection for the lock mechanism, safeguarding it against both forced entry attempts and harsh weather conditions. It is highly versatile, designed to suit Union (formerly Chubb) 3G114 and E3G114 3-inch lock cases, as well as the Gatemaster SBD Euro Cylinder Operated Deadlock.

Please note: The lock and box keep are sold separately.

Technical Specifications

- **Height:** 140mm
- **Width:** 85mm
- **Depth:** 30mm
- **Material:** 2.5mm steel
- **Weight:** 601g
- **Pack Quantity:** 1
- **Manufacturer Reference:** 5CDC

Key Features

- **Easy Installation:** Designed to be welded directly into the gate frame before painting or galvanising.
- **Robust Protection:** Shields the lock mechanism from physical attack and harsh outdoor elements.
- **Versatile Compatibility:** Suits Union (formerly Chubb) 3G114 and E3G114 3-inch lock cases, and the Gatemaster SBD Euro Cylinder Operated Deadlock.
- **Durable Construction:** Made from strong, weldable steel for long-lasting security.

Brand Profile

Gatemaster

Gatemaster is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle**, **mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into "bolt-on simplicity": many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
