Specification Summary

Brand	Gatemaster
Product type	Gatemaster

Product Description

The Gatemaster DGL Digital Gate Lock is a highly durable, keyless security solution designed specifically for outdoor gates. Built to withstand the elements, this lock is weather-resistant and salt-spray tested to marine grade, ensuring reliable performance in harsh environments.

This mechanical digital lock features a double-sided keypad, requiring a code for entry from both sides. It operates entirely mechanically, meaning no power or wiring is required. For added convenience, the lock includes an auto-latching function that secures the gate automatically when closed, alongside a deadlocking function. It is supplied with a brass bearing plate to support the latchbolt, reducing wear and ensuring smooth operation.

The adjustable-length bolt makes the unit fully non-handed and suitable for both left and right-handed gates. This lock is available in multiple options to suit different gate frame thicknesses, ranging from 10mm to 30mm (DGL01) or 40mm to 60mm (DGL02). Please choose your required gate frame size and manufacturer reference from the options below.

Technical Specifications

- **Brand:** Gatemaster
- **Mechanism:** Mechanical Digital
- **Keypad:** Double-sided (10 buttons)
- **Code Length:** 3 to 5 digits (over 500 combinations)
- **Operation:** Thumbturn on entry of code (both inside and outside)
- **Bolt Throw:** 20mm (adjustable length)
- **Case Width:** 30mm
- **Overall Width:** 98mm
- **Finish:** Black
- **Handing:** Non-handed (reversible)
- **Gate Frame Thickness:** To suit 10mm to 30mm, or 40mm to 60mm gate frames (please choose from the options below)
- **Manufacturer Reference:** DGL01 or DGL02 (please choose from the options below)
- **Guarantee:** 1 Year

Key Features

- **Marine Grade Durability:** Salt-spray tested and weather-resistant for long-lasting outdoor performance.
- **Double-Sided Keypad:** Keyless access control requiring code entry from both sides of the gate.
- **Auto-Latching & Deadlocking:** Automatically latches shut when closed, with deadlocking functions for reliable security.
- **Smooth Operation:** Supplied with a brass bearing plate to support the latchbolt and reduce wear.
- **Adjustable Bolt Length:** Easily adjusted to suit left or right-handed applications.
- **Easy Installation:** Designed to be bolted securely in place on gate frames.

Brand Profile

Gatemaster

Gatemaster is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle**, **mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into "bolt-on simplicity": many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
