Specification Summary

Brand	Gatemaster
Product type	Gate Locks

Product Description

The Gatemaster Gate Restrainer Safety Device is a simple yet essential safety solution designed to prevent swing gates from falling over in the event of a top hinge failure. This heavy-duty gate tether provides crucial protection for pedestrians and property, ensuring peace of mind for both residential and commercial installations.

Constructed with a tough stainless steel wire rope and robust crimped end ferrules, this safety device is built to withstand demanding outdoor conditions. It is incredibly easy to install, requiring only a 13mm hole to be drilled into the gate and the post, allowing the ends to be pushed through and secured. The device is supplied complete with plastic bushes to protect the gate from scratches and ensure smooth operation.

This gate restrainer is available in different sizes and weight capacities to suit your specific requirements. Please select from the options below to choose the correct diameter, weight capacity, and manufacturer reference for your gate.

Technical Specifications

- **Brand:** Gatemaster
- **Material:** Stainless steel and brass
- **Finish:** Stainless Steel
- **Diameter:** 3mm or 4mm (please select from the options below)
- **Maximum Gate Weight:** 260kg or 500kg (please select from the options below)
- **Manufacturer Reference:** GRS 03 or GRS 04 (please select from the options below)
- **Pack Quantity:** 1
- **Weight:** 900g or 1.2kg (please select from the options below)

Key Features

- **Hinge Failure Protection:** Prevents the gate from falling over and causing injury or damage if the top hinge fails.
- **Robust Construction:** Features a tough stainless steel wire rope with robust crimped end ferrules and a brass construction.
- **Easy Installation:** Simple to fit by drilling a 13mm hole into both the gate and the post.
- **Protective Bushes:** Supplied complete with plastic bushes to prevent scratches and allow smooth wire movement.
- **Multiple Options:** Available in different diameters and weight capacities to suit gates up to 260kg or 500kg (please select below).

Brand Profile

Gatemaster

Gatemaster is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle**, **mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into "bolt-on simplicity": many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
