Specification Summary

Brand	Gatemaster
Product type	Gate Locks

Product Description

The Gatemaster Long Throw Gate Locking Bolt is a highly durable, surface-mounted security solution designed for both wooden and metal gates. Manufactured from high-grade stainless steel, this lock is built to withstand harsh outdoor weather conditions. It features a robust deadbolt with a long 53mm throw that operates with a single turn of the key, making it an excellent choice for wooden gates that naturally expand and contract over time.

This lock is non-handed, meaning it can be easily installed on both left-handed and right-handed gates. It provides secure key access from both sides of the gate and comes complete with a 5-pin cog mechanism euro cylinder and three keys.

To accommodate different gate depths, this locking bolt is available in multiple configurations:

- **GLB:** Suitable for gate thicknesses up to 24mm (featuring a 30/30 overall cylinder size and weighing 675g).
- **GLB02:** Suitable for gate thicknesses up to 60mm (featuring a 65/35 overall cylinder size and weighing 935g).

Please select your required door thickness, cylinder size, and manufacturer reference from the options below to ensure the perfect fit for your gate.

Technical Specifications

- **Brand:** Gatemaster
- **Material:** Stainless Steel
- **Dimensions:** 80mm (Length) x 76mm (Width) x 17mm (Depth)
- **Hole Centres:** 57mm horizontal and 63mm vertical
- **Cylinder Size Overall:** 30/30 or 65/35 (please choose from the options below)
- **Door Thickness:** Up to 24mm or Up to 60mm (please choose from the options below)
- **Manufacturer Reference:** GLB or GLB02 (please choose from the options below)
- **Weight:** 675g or 935g (please choose from the options below)
- **Pack Quantity:** 1
- **Packaging:** Boxed

Key Features

- **Double-Sided Key Access:** Provides secure locking and unlocking from both the inside and outside of the gate.
- **Long 53mm Throw:** The strong deadbolt moves 53mm with a single turn of the key, accommodating gate movement and weathering.
- **Weather Resistant:** Manufactured from durable stainless steel to ensure long-lasting performance in all outdoor conditions.
- **Versatile Fitting:** Suitable for use on both wooden and metal gates.
- **Non-Handed Design:** Reversible configuration makes it suitable for both left and right-handed gates.
- **Complete Kit:** Supplied with a high-quality 5-pin euro cylinder and 3 keys.

Brand Profile

Gatemaster

Gatemaster is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle**, **mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into "bolt-on simplicity": many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
