Specification Summary

Brand	Gatemaster
Product type	Gate Locks

Product Description

The Gatemaster SBD Bolt On Deadlock is a highly durable and secure locking solution designed specifically for metal gates. Combining a solid stainless steel deadbolt with a 5-pin euro cylinder, this lock offers robust security and smooth operation. Engineered to withstand harsh outdoor environments, it features marine-grade weather resistance, making it ideal for external gates.

This versatile deadlock is non-handed, allowing it to be fitted to both left and right-handed gates. It is designed to be bolted securely in place, requiring only three holes to be drilled into the gate frame for a straightforward installation. The lock is supplied complete with three keys, fixing bolts, and a bolt support plate with a brass bearing to reduce friction and extend the lifespan of the lock.

To accommodate different gate profiles, this product is available in multiple sizes to suit gate frame thicknesses ranging from 10mm up to 60mm. Please select your required gate frame size and manufacturer reference from the options below to ensure a perfect fit.

Technical Specifications

- **Brand:** Gatemaster
- **Finish:** Black
- **Deadbolt Throw:** 30mm
- **Cylinder Type:** 5-pin euro cylinder (keyed both sides)
- **Gate Frame Thickness:** Options available to suit 10mm to 30mm or 40mm to 60mm gate frames (please choose from the options below)
- **Manufacturer Reference:** SBD1601 or SBD1602 (please choose from the options below)
- **Handing:** Non-handed (suitable for left or right-handed gates)
- **Keys Supplied:** 3
- **Case Width:** 98mm
- **Case Depth:** 30mm
- **Weight:** 1.254kg

Key Features

- **Marine-Grade Durability:** Weather-resistant design engineered to withstand harsh outdoor environments.
- **Robust Stainless Steel Deadbolt:** Provides a secure 30mm throw with a single turn of the key.
- **Double-Sided Key Access:** Conveniently operated by key from both the inside and outside of the gate.
- **Easy Bolt-On Installation:** Simple to install by drilling just three holes in the gate frame, with all fixing bolts included.
- **Reduced Wear and Friction:** Supplied with a bolt support plate featuring a brass bearing to ensure a smooth action and extended product life.
- **Multiple Sizes Available:** Choose the correct model below to suit your specific gate frame thickness.

Brand Profile

Gatemaster

Gatemaster is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle**, **mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into "bolt-on simplicity": many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
