Specification Summary

Brand	Gatemaster
Product type	Gate Closer

Product Description

The Gatemaster SGC Spring Gate Closer is a reliable, heavy-duty helical spring closer designed for gates weighing up to 80kg. Featuring a pivoted arm, this closer provides a smooth and consistent self-closing action, helping to keep your property secure and gates closed.

The closing force can be easily adjusted to suit your specific gate setup. By using the supplied tension bar, you can increase or decrease the spring tension to achieve the ideal closing speed. To prevent wear and tear on the gate surface, the unit comes complete with a roller bracket that guides the spring arm smoothly.

Installation is straightforward, requiring the spring to be screw-fixed to the gate post and the roller bracket to the gate itself. Please note that fixing screws are not included, allowing you to select the most appropriate fasteners for your specific gate material.

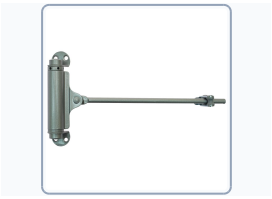

Technical Specifications

- **Brand:** Gatemaster
- **Manufacturer Reference:** SGC
- **Part Number:** L33105
- **Finish:** Silver
- **Maximum Gate Weight:** 80kg
- **Product Weight:** 650g
- **Pack Quantity:** 1

Key Features

- **Adjustable Closing Force:** Easily adjust the spring tension and closing speed using the supplied tension bar.
- **Smooth Operation:** Helical spring design with a pivoted arm for consistent self-closing.
- **Protective Roller Bracket:** Included roller bracket guides the arm and prevents wear on the gate surface.
- **High Capacity:** Suitable for gates weighing up to 80kg.
- **Straightforward Installation:** Simple screw-fix application to the gate post and gate (screws not included).

Brand Profile

Gatemaster

Gatemaster is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle**, **mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into "bolt-on simplicity": many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
