Specification Summary

Brand	Gatemaster
Product type	Gate Locks

Product Description

The Gatemaster Slotted Lock Plate Screw Fixing is a robust keep plate designed specifically for use with Gatemaster GLB and GLB02 gate locking bolts. Ideal for wooden gates, this screw-fixed lock plate is typically installed on the second leaf of a double gate. When the locking bolt's throw passes through the slot and is secured by the deadbolt, it prevents the gates from being forced or sprung open, significantly enhancing your outdoor

security.

In addition to double gate setups, this versatile slotted plate can also be used to provide extra security on single gates. It is available in two durable finishes to suit your environment: Galvanised (GLBST) or Stainless Steel (GLBS). Please choose your preferred finish and manufacturer reference from the options below.

Technical Specifications

- **Brand:** Gatemaster
- **Suits Product:** Gatemaster GLB and GLB02 gate locking bolts
- **Length:** 85mm
- **Width:** 12.5cm
- **Depth:** 4mm
- **Height:** 4mm
- **Finish:** Galvanised or Stainless Steel (please choose from the options below)
- **Manufacturer Reference:** GLBS or GLBST (please choose from the options below)
- **Pack Quantity:** 1
- **Packaging:** Loose

Key Features

- **Enhanced Security:** Prevents double wooden gates from being sprung open when secured with the deadbolt
- **Versatile Application:** Designed for double gates, but can also be used to provide additional security on single gates
- **Compatibility:** Specifically designed for use with Gatemaster GLB and GLB02 gate locking bolts
- **Easy Installation:** Simple screw-fixed design ideal for wooden gates
- **Durable Options:** Available in Galvanised or Stainless Steel finishes to withstand outdoor conditions

Brand Profile

Gatemaster

Gatemaster is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle**, **mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into "bolt-on simplicity": many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
