Specification Summary

Brand	Gatemaster
Product type	Gatemaster

Product Description

The Gatemaster Superlock Digital Single Sided is a slim, robust mechanical digital lock designed specifically for metal gate frames. It features a digital keypad on the exterior for secure, keyless entry and a free-exit rear handle on the inside. This lock is ideal for box section metal gate frames and is exceptionally easy to install, requiring only three drilled holes to bolt directly onto the gate.

A key benefit of this single-sided model is its integrated hold-back function, which is easily activated via a switch on the rear handle to keep the gate open when required. The latchbolt is adjustable in length and is supported by a guide plate with a brass bearing to reduce friction and ensure long-lasting durability.

This lock is available in multiple options to suit your specific gate setup. It comes in two sizes to fit either 10mm to 30mm or 40mm to 60mm gate frames, and is available in both left-handed and right-handed configurations. Please choose your required gate frame thickness, handing, manufacturer reference, and barcode from the options below.

Technical Specifications

- **Brand:** Gatemaster
- **Mechanism:** Mechanical digital
- **Case Width:** 41mm
- **Overall Width:** 70mm
- **Bolt Throw:** 15mm
- **Screw Centres:** 140mm
- **Code Length:** 3 to 5 digits (over 500 combinations)
- **Number of Buttons:** 14
- **Gate Frame Thickness:** 10mm to 30mm or 40mm to 60mm (please select from the options below)
- **Handing:** Left hand or right hand (please select from the options below)
- **Operation Outside:** Thumbturn on entry of correct code
- **Operation Inside:** Thumbturn free exit
- **Finish:** Black
- **Weight:** 2.2kg
- **Guarantee:** 1 Year

Key Features

- **Keyless Access:** Mechanical digital keypad on the outside with a convenient free-exit rear handle on the inside.
- **Hold-Back Function:** Integrated switch on the rear handle allows the gate to be held open for easy passage.
- **Slim Profile:** Only 70mm wide stainless steel lock case to fit a wide range of narrow metal gate profiles.
- **Easy Installation:** Simple bolt-on design requiring only three drilled holes in the gate frame.
- **Adjustable Latchbolt:** Latchbolt can be adjusted for a precise fit and projects 15mm into the gate post for secure latching.
- **Durable Construction:** Supplied with a stainless steel bolt support plate and a brass bearing to reduce friction and wear.
- **Complete Kit:** Supplied with a guide plate, gate post strike plate, and fixing bolts.

Brand Profile

Gatemaster

Gatemaster is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle**, **mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into "bolt-on simplicity": many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
