Specification Summary

Brand	Gatemaster
Product type	Gatemaster

Product Description

The Gatemaster Superlock Double Sided Surface Fix Digital Lock is a robust, fully mechanical keyless entry solution designed specifically for wooden gates. With its surface-mounted design, this lock is incredibly straightforward to install, requiring no complex mortising or chiselling.

Equipped with a 14-button marine-grade keypad on both sides, this lock provides secure, controlled access for both entry and exit. To open the gate from either side, simply enter your code and turn the thumbturn. It features a convenient auto-latching mechanism that automatically secures the gate when closed, alongside a length-adjustable latchbolt to ensure a precise, reliable fit.

Constructed with a durable black powder-coated stainless steel case and corrosion-resistant marine-grade keypads, this mechanical lock requires no power or wiring, making it ideal for harsh outdoor environments.

This unit is handed and is available in both Left Hand and Right Hand configurations. Please choose your required handing, manufacturer reference, and barcode from the options below to ensure the perfect fit for your gate.

Technical Specifications

- **Mechanism:** Mechanical Digital
- **Keypad:** 14-button marine-grade keypad on both sides
- **Combinations:** 500+
- **Finish:** Black
- **Case Material:** Powder-coated stainless steel
- **Width:** 42mm
- **Depth:** 50mm
- **Weight:** 2.5kg
- **Handing:** Left Hand (BDGWL) or Right Hand (BDGWR) options available (please select from the options below)
- **Operation Inside:** Thumbturn on entry of code
- **Operation Outside:** Thumbturn on entry of code
- **Pack Quantity:** 1

Key Features

- **Double-Sided Code Entry:** Secure keypad access on both the interior and exterior of the gate for controlled entry and exit.
- **Surface-Mounted Installation:** Designed specifically for wooden gates, allowing for quick and easy surface-fix installation without the need for chiselling.
- **Auto-Latching Convenience:** The latchbolt automatically latches into the gate frame when the gate is closed.
- **Adjustable Latchbolt:** Length-adjustable latchbolt ensures a precise, tolerant fit to your gate frame.
- **Weather & Corrosion Resistant:** Features marine-grade keypads and a powder-coated stainless steel casing for reliable outdoor durability.
- **No Power Required:** Fully mechanical operation means no wiring, batteries, or external power sources are needed.

Brand Profile

Gatemaster

Gatemaster is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle**, **mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into "bolt-on simplicity": many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
