Specification Summary

Brand	Gatemaster
Product type	Gatemaster

Product Description

The Gatemaster Superlock Single Sided Surface Fix Digital Lock provides a secure, reliable, and easy-to-install access control solution designed specifically for wooden gates. Combining the convenience of a mechanical keypad with robust outdoor durability, this surface-mounted lock is ideal for securing residential or commercial timber gates.

Operation is simple and secure: entry from the outside requires a code via the 14-button marine-grade keypad, while exit from the inside is free and easy using the lever handle. With its auto-latching design, the gate automatically locks when closed as the adjustable latchbolt latches into the gate frame.

Built to withstand the elements, the lock features a highly corrosion-resistant, black powder-coated stainless steel casing and marine-grade components. Because it is completely mechanical, it requires no electrical wiring or external power source.

Please note that this unit is handed. It is available in Left Hand and Right Hand configurations (Manufacturer References BDGSWL and BDGSWR, with corresponding barcodes). Please select your required handing, manufacturer reference, and barcode from the options below to ensure the correct fit for your gate.

Technical Specifications

- **Mechanism:** Mechanical Digital
- **Outside Operation:** Thumbturn on entry of correct code
- **Inside Operation:** Lever handle (free exit)
- **Number of Buttons:** 14
- **Combinations:** 500+
- **Finish:** Black
- **Width:** 42mm
- **Depth:** 50mm
- **Weight:** 2.5kg
- **Handing:** Left Hand or Right Hand (please choose from the options below)
- **Manufacturer Reference:** BDGSWL or BDGSWR (please choose from the options below)
- **Barcode:** Multiple options available (please choose from the options below)

Key Features

- **Designed for Wooden Gates:** Surface-mounted lock specifically engineered for timber gate installations.
- **Auto-Latching Convenience:** Latchbolt automatically latches into the gate frame upon closing.
- **Weather Resistant:** Marine-grade keypad and powder-coated stainless steel casing offer excellent corrosion resistance.
- **No Power Required:** Fully mechanical design with no wiring or batteries needed.
- **Adjustable Latchbolt:** Length-adjustable latchbolt ensures a precise and secure fit on site.
- **Multiple Handing Options:** Available in Left Hand and Right Hand variants to suit your gate's configuration.

Brand Profile

Gatemaster

Gatemaster is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle**, **mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into "bolt-on simplicity": many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
