Specification Summary

Brand	Geze
Product type	Accessory

Product Description

The GEZE Boxer Closer Guide Rail is a high-quality accessory designed specifically for use with the GEZE Boxer range of integrated door closers. Ideal for single-action, single-leaf doors, this guide rail is engineered to provide a sleek, low-profile solution for installations where space is limited.

Featuring a durable silver finish, this guide rail is supplied complete with a lever arm, a screwed slide block, and all the necessary fixings and fitting templates required for a secure and straightforward installation. The compact dimensions of just 12mm in height and 20mm in width ensure that the closer mechanism remains discreetly concealed within the door leaf and frame when the door is closed, maintaining clean architectural lines.

Please note that this product includes the guide rail and lever arm assembly only; the door closer body is available separately.

Technical Specifications

- **Brand:** GEZE
- **Manufacturer Reference:** 129213
- **Finish:** Silver
- **Dimensions:** 440mm (L) x 20mm (W) x 12mm (H)
- **Installation Depth:** 20mm
- **Weight:** 527g
- **Compatibility:** Designed to suit GEZE Boxer integrated door closers

Brand Profile

Geze

GEZE is a German, **family-owned** global manufacturer of **door, window, and safety technology**, best known in the trade for **door closers**, **automatic door systems** (sliding/swing/revolving), **window drives**, and **smoke & heat extraction (SHEV)** solutions used in modern building safety and automation.

Founded in **1863**, GEZE remains independently owned and headquartered in **Leonberg**, near Stuttgart - one of the reasons it's often described as a "proper engineering company" rather than a brand label slapped on a catalogue.

In practical terms, GEZE lives in the space where **comfort meets compliance**:

- **Door closing**: from standard overhead closers to integrated systems for higher-spec doors and fire/smoke applications.
- **Automatic entrances**: operators for swing and sliding doors used in public buildings, retail, airports, offices—accessibility and flow without sacrificing safety.
- **Safety + building automation**: electrically operated window systems for **natural ventilation** and for **smoke and heat extraction** in a fire, plus increasing emphasis on digital networking of doors/windows in "smart building" setups.

Scale-wise, GEZE states it has **3,000+ employees worldwide**, **37 subsidiaries**, and reported **€507m+ turnover (FY 2022/23) -** big enough to be everywhere, still small enough to feel focused.
