Specification Summary

Brand	Geze
Product type	Overhead

Product Description

The GEZE TS5000 Size 2-6 Overhead Door Closer Body is a high-performance, heavy-duty door closer designed for single-action internal doors. Suitable for doors up to 1,400mm wide and weighing up to 120kg, this robust closer body is ideal for high-traffic commercial and public environments, and is fully certified for use on fire and smoke protection doors with a 120-minute fire rating.

A standout feature of the TS5000 is its integrated optical closing force indicator, which allows the power size (EN 2-6) to be easily checked and adjusted. For maximum convenience and ease of installation, all key adjustments - including closing speed, latching action, and backcheck - can be made directly from the front of the closer body. Fully reversible, it can be installed on both left and right-handed doors without any conversion.

Technical Specifications

- **Brand:** GEZE
- **Model Reference:** TS5000
- **Power Size:** EN 2 to 6 (adjustable)
- **Max Door Width:** 1400mm
- **Max Door Weight:** 120kg

Brand Profile

Geze

GEZE is a German, **family-owned** global manufacturer of **door, window, and safety technology**, best known in the trade for **door closers**, **automatic door systems** (sliding/swing/revolving), **window drives**, and **smoke & heat extraction (SHEV)** solutions used in modern building safety and automation.

Founded in **1863**, GEZE remains independently owned and headquartered in **Leonberg**, near Stuttgart - one of the reasons it's often described as a "proper engineering company" rather than a brand label slapped on a catalogue.

In practical terms, GEZE lives in the space where **comfort meets compliance**:

- **Door closing**: from standard overhead closers to integrated systems for higher-spec doors and fire/smoke applications.
- **Automatic entrances**: operators for swing and sliding doors used in public buildings, retail, airports, offices—accessibility and flow without sacrificing safety.
- **Safety + building automation**: electrically operated window systems for **natural ventilation** and for **smoke and heat extraction** in a fire, plus increasing emphasis on digital networking of doors/windows in "smart building" setups.

Scale-wise, GEZE states it has **3,000+ employees worldwide**, **37 subsidiaries**, and reported **€507m+ turnover (FY 2022/23) -** big enough to be everywhere, still small enough to feel focused.
