Brand	JCB
Product type	Battery

Product Description

The JCB LR44 (A76) Alkaline Button Cell Batteries are a reliable, high-performance power source designed for a wide range of small electronic devices. Supplied in a convenient blister pack of 10, these 1.5V alkaline batteries are perfect for everyday items such as vehicle key fobs, calculators, digital thermometers, cameras, toys, and games.

With an excellent storage life at room temperature, these batteries are ideal to keep on hand as spares. They offer stable voltage and long-lasting power, ensuring your devices run smoothly and efficiently. Designed to replace standard LR44, A76, AG13, and LR1154 battery types, they provide a versatile power solution for both domestic and professional use.
