Specification Summary

Brand	VBH
Product type	Rim Cylinders
Keyway	GreenteQ

Product Description

The greenteQ Gamma Rim Latch Cylinder is a high-quality replacement cylinder designed to upgrade the security and convenience of your existing night latch. While many standard rim cylinders only feature 5 pins and come with 2 keys, the Gamma cylinder offers an immediate upgrade with a robust 6-pin mechanism for enhanced pick resistance and is supplied with 3 'Q' branded keys as standard.

One of the standout benefits of the greenteQ Gamma range is its versatility. These rim cylinders can be keyed alike with greenteQ Gamma profile cylinders, allowing you to create a convenient 'whole house suite' where a single key operates both your front door rim latch and other external doors fitted with euro cylinders.

Compatible with most standard night latches on the market, the Gamma rim cylinder is supplied complete with all necessary fixings, a mounting plate, and a decorative cylinder surround. It features an open key profile, meaning spare keys can be easily cut at any high street locksmith. Available in attractive brass and nickel finishes, please select your preferred option from the variants below.

KEYED ALIKE ORDERS ONLY SHIP WITH 3 KEYS TOTAL

Technical Specifications

- **Cylinder Type:** Rim latch cylinder
- **Number of Pins:** 6
- **Keys Supplied:** 3 keys
- **Key Profile:** Open profile (easy to duplicate)

Brand Profile

VBH

VBH is one of Europe's heavyweight suppliers of **window and door hardware**, specialising in the parts that make fenestration actually behave in the real world: **multipoint locks, hinges, handles, cylinders, seals, fixings, and ancillaries** for uPVC, aluminium, timber and composite systems. In trade terms, VBH is the "if it moves, seals, locks or aligns, we probably stock it" kind of distributor.

The wider **VBH Group** has long been described as **Europe's largest trading house for window and door fittings** (a 2011 VBH Holding AG press release cites group sales of ~€800m in 2010, which gives you a sense of the scale they were already operating at back then).

In the UK & Ireland, **VBH (GB) Ltd** has supplied hardware to fabricators and installers **since 1982**, with its head office in **Gillingham, Kent** (and additional UK locations such as East Kilbride).

A big part of VBH's identity is its own in-house brand, **greenteQ**, launched in **2009**. greenteQ has expanded into a broad catalogue of hardware and ancillaries and is widely pushed alongside VBH's distribution of major third-party hardware lines.
