Specification Summary

Brand	GU
Product type	Panic Bolt

Product Description

The GU BKS Panic Bar Actuator is a high-quality push bar panic actuator designed specifically for use with the GU Secury Panic E multipoint lock system. Engineered for reliability in critical situations, this unit is ideal for installation on smoke protection, fire protection, and emergency escape doors.

Constructed from durable aluminium with a clean silver finish, this robust actuator is suitable for heavy door leaves weighing up to 300kg. It is supplied complete with all necessary fixings for a straightforward installation. Please note that the matching cross bar is not included and must be purchased separately.

To ensure compliance with safety standards, this actuator is designed to meet DIN 18273, DIN 4102, and EN 1634. Additionally, it achieves EN 1125 approval when installed in conjunction with approved BKS locks, providing peace of mind for commercial and public building applications.

Brand Profile

GU

GU (short for **Gretsch-Unitas**) is a German, family-run **window and door technology** group best known in the trade for **multipoint locking**, **door & window hardware**, and **automatic entrance systems**. The company's headquarters are in **Ditzingen, Germany**, and it positions itself around integrated "systems" for windows, doors and façades rather than single standalone products.

The GU Group manufactures and sells across several well-known brands, most notably:

- **GU** – architectural hardware and systems for windows/doors/façades
- **BKS** – locking technology (cylinders, locks, locking systems)
- **FERCO** – hardware, especially prominent in the window/door fabrication world

In many markets (including the UK), GU is a staple name for **uPVC/aluminium door locks and window hardware**, plus higher-spec commercial solutions like **escape route hardware** and **mechatronic locking**, depending on the sub-brand and product line.

History-wise, multiple sources place GU's origins in **1907** in the Stuttgart area, and the company has since grown into a global group with many production/sales companies across dozens of countries.
