Specification Summary

Brand	Hooply
Product type	Container

Product Description

The HOOPLY 31 CEFIRO 4 Point Combat Lock Sashcase is a specialist high-security lockcase designed specifically for steel doors, shipping containers, and steel storage units. Providing a robust and durable replacement for worn or damaged Hooply centre cases, this sashcase ensures your security setup remains dependable.

This versatile unit features a fully reversible latch, allowing it to be easily configured for both left-hand and right-hand door applications. Handing adjustment is straightforward: simply use a flat-bladed screwdriver to push up the latch hold cam on the side of the lockcase, remove and reverse the latch, and click it back into place.

Operating via a Euro cylinder, the lock utilizes a secure double-turn mechanism (Locking Method C), requiring two full turns of the key to lock or unlock, with an additional turn to withdraw the latch. For a complete security solution, it can be seamlessly paired with STB01 side locks and CEFIRO ZTB002 handles.

Technical Specifications

- **Brand:** Hooply
- **Manufacturer Reference:** #31CE
- **Centres:** 85mm
- **Screw Centres:** 228mm
- **Case Height:** 228mm
- **Case Width:** 29mm
- **Case Depth:** 112mm
- **Faceplate Height:** 360mm
- **Faceplate Width:** 38mm
- **Bolt Throw:** 32mm
- **Mechanism:** Euro Cylinder
- **Handing:** Reversible

Brand Profile

Hooply

HOOPLY is a specialist door-hardware brand that shows up a *lot* in the world of **steel security doors** and **shipping/container doors**. In the trade, HOOPLY is basically shorthand for that very specific ecosystem of **68mm-centre lockcases, handles, and multipoint "gearbox" setups** that you see on site cabins, compounds, plant rooms, and steel personnel doors.

What HOOPLY makes (the practical identity):

- **Multipoint centre cases / gearboxes** for steel doors and container door multi-lock systems (often described as "key operated latch + multiple deadbolts").
- **Door handle sets** designed around those systems, commonly taking a **euro cylinder**, and often featuring an internal **thumbturn/snib** for privacy/deadlocking functions.
- Associated **container/steel door hardware** like **hinges** (including stainless ball-bearing hinges with anti-knockout details) and other fittings.

Why HOOPLY is so common:

- It's become a de-facto standard in certain door types, where the key measurements recur constantly (e.g. **68mm centres** and common fixing patterns).
- It's very "trade reality"-driven: straightforward replacement parts, predictable fitment, and lots of off-the-shelf compatibility with steel door sets and container conversions.
