Specification Summary

Brand	Hooply
Product type	Container

Product Description

The Hooply 33 Ultra Container Door Gearbox is a heavy-duty replacement centre case specifically designed for steel doors, shipping containers, and steel storage units. If your existing container lock is worn or damaged, this unit provides a highly cost-effective solution, allowing you to replace only the central gearbox rather than the entire multipoint locking system.

Featuring a high-security four-deadbolt configuration and a key-operated latch, this gearbox offers reliable and durable performance. The latch is fully reversible, making it suitable for both left-hand and right-hand opening doors. Adjusting the handing is straightforward: simply remove the screw at the top of the case, toggle the slide switch, reverse the latch, slide the toggle back, and secure the screw.

Operation

This unit operates under Locking Method C. Two full turns of the key are required to lock, and two full turns to unlock. An additional turn of the key will fully withdraw the latch.

Technical Specifications

- **Brand:** Hooply
- **Manufacturer Reference:** HL33
- **Centres:** 68mm
- **Faceplate Width:** 30mm
- **Faceplate Height:** 240mm
- **Screw Centres:** 225mm
- **Case Height:** 176.8mm
- **Case Width:** 105.3mm
- **Bolt Diameter:** 18mm
- **Bolt Throw:** 30mm
- **Finish:** Stainless Steel
- **Handing:** Reversible
- **Weight:** 2.5kg
- **Packaging:** Boxed

Key Features

- Very heavy-duty construction ideal for steel doors, shipping containers, and storage units
- Cost-effective replacement for worn or damaged Hooply centre cases without replacing the entire multipoint lock
- Reversible latch design allows for easy handing adjustment on-site
- High-security four-deadbolt configuration with key-operated latch
- Locking Method C operation: Two full key turns to lock/unlock, with an extra turn to withdraw the latch

Brand Profile

Hooply

HOOPLY is a specialist door-hardware brand that shows up a *lot* in the world of **steel security doors** and **shipping/container doors**. In the trade, HOOPLY is basically shorthand for that very specific ecosystem of **68mm-centre lockcases, handles, and multipoint "gearbox" setups** that you see on site cabins, compounds, plant rooms, and steel personnel doors.

What HOOPLY makes (the practical identity):

- **Multipoint centre cases / gearboxes** for steel doors and container door multi-lock systems (often described as "key operated latch + multiple deadbolts").
- **Door handle sets** designed around those systems, commonly taking a **euro cylinder**, and often featuring an internal **thumbturn/snib** for privacy/deadlocking functions.
- Associated **container/steel door hardware** like **hinges** (including stainless ball-bearing hinges with anti-knockout details) and other fittings.

Why HOOPLY is so common:

- It's become a de-facto standard in certain door types, where the key measurements recur constantly (e.g. **68mm centres** and common fixing patterns).
- It's very "trade reality"-driven: straightforward replacement parts, predictable fitment, and lots of off-the-shelf compatibility with steel door sets and container conversions.
