Specification Summary

Brand	Hooply
Product type	Container

Product Description

The Hooply 506 Side Lock Shoot Bolt is a high-quality auxiliary lock designed for use with Hooply gearboxes on steel personnel doors. Also known as a lateral lock or multi-locking auxiliary lock, it is typically used in steel doors that feature side locks rather than top and bottom shoots. It is ideal for multi-point locking steel hinged doors where the mechanism connects directly to the sashlock without extending rods to the top and bottom of the door leaf.

When installed as a pair (one at the top and one at the bottom), these side locks provide an additional four secure locking points to your Hooply security locking system. This non-handed, reversible lock is sold individually, allowing you to purchase the exact quantity needed for your setup.

Please note: This product is not compatible with Latham's stock steel door ranges.

Technical Specifications

- **Brand:** Hooply
- **Manufacturer Reference:** 506
- **Case Height:** 100mm
- **Case Depth:** 75mm
- **Faceplate Height:** 165mm
- **Faceplate Width:** 20mm
- **Handing:** Reversible (Non-handed)
- **Weight:** 250g
- **Pack Quantity:** 1

Brand Profile

Hooply

HOOPLY is a specialist door-hardware brand that shows up a *lot* in the world of **steel security doors** and **shipping/container doors**. In the trade, HOOPLY is basically shorthand for that very specific ecosystem of **68mm-centre lockcases, handles, and multipoint "gearbox" setups** that you see on site cabins, compounds, plant rooms, and steel personnel doors.

What HOOPLY makes (the practical identity):

- **Multipoint centre cases / gearboxes** for steel doors and container door multi-lock systems (often described as "key operated latch + multiple deadbolts").
- **Door handle sets** designed around those systems, commonly taking a **euro cylinder**, and often featuring an internal **thumbturn/snib** for privacy/deadlocking functions.
- Associated **container/steel door hardware** like **hinges** (including stainless ball-bearing hinges with anti-knockout details) and other fittings.

Why HOOPLY is so common:

- It's become a de-facto standard in certain door types, where the key measurements recur constantly (e.g. **68mm centres** and common fixing patterns).
- It's very "trade reality"-driven: straightforward replacement parts, predictable fitment, and lots of off-the-shelf compatibility with steel door sets and container conversions.
